

Leave Management Policy – How the System Works

This document explains **how the leave system behaves, what decisions it makes, and why** — in simple, HR-friendly language. It is meant for employees, managers, and HR teams to clearly understand the policy logic used by the system.

1. Purpose of the System

The leave system is designed to: - Apply **uniform rules** for everyone - Prevent misuse of leave (clubbing, overlap, last-minute abuse) - Ensure **fair monthly limits** - Respect **employment status** (Intern / Probation / Permanent) - Allow **admin overrides only where policy allows**

All rules are enforced automatically. No leave is approved unless it fully complies with policy.

2. Employee Categories & Eligibility

Permanent Employees

Permanent employees can apply for: - Planned Leave - Casual Leave - Sick Leave - Compensatory (Comp-Off) - Loss of Pay (LOP) - Backdated Leave

Probation / Intern Employees

Probationers and interns: - **Can only apply for Loss of Pay (LOP)** - Can apply for **Compensatory Leave** - **✗** Cannot use Casual, Sick, Planned, or Backdated leave

This ensures benefits are unlocked only after confirmation.

3. Overlapping Leave Protection

The system **never allows overlapping leave dates**.

If an employee already has a **Pending or Approved** leave on a date: - Any new request covering the same date is **automatically rejected**

This rule **cannot be overridden by Admin**.

4. Leave Types & Their Rules

4.1 Casual Leave

- Only for **Permanent employees**
 - Must be applied **at least 4 days in advance**
 - Subject to weekday & Saturday clubbing rules
 - Deducted from Casual balance
-

4.2 Planned Leave

- Only for **Permanent employees**
- Advance notice depends on **working days**:
 - 5–7 working days → **30 days notice**
 - More than 7 working days → **60 days notice**
- Exempt from monthly working-day cap
- Still subject to request-count limits

Planned leave encourages long-term planning.

4.3 Sick Leave

- Only for **Permanent employees**
 - Medical certificate is **mandatory**
 - Can be same-day or backdated
 - Long sick leaves raise HR warnings
-

4.4 Loss of Pay (LOP)

- Available to **all employees**
- No balance required
- No advance notice restriction
- Still counts toward **monthly limits**

LOP is the fallback when other leave types are not allowed.

4.5 Compensatory Leave (Comp-Off)

Comp-Off is granted for working on weekends.

Rules: - Maximum **2 Comp-Off requests per month** - Worked date must be **Saturday or Sunday of the current month** - Must be applied **by Thursday of the same week** - Saturday must be a **working Saturday** as per policy - Sunday is always valid

This prevents misuse of old or future weekends.

4.6 Backdated Leave

Backdated leave means applying for past dates.

- **Permanent employees:**
 - Allowed
 - Deducts **Sick first, then Casual**
 - Rejected if combined balance is insufficient
 - **Probation / Intern:**
 - Must be applied as **LOP only**
-

5. Monthly Limits (Very Important)

5.1 Monthly Request Count

Each employee can submit **maximum 4 leave requests per month**.

Included in the count: - Casual - Sick - Planned - LOP

Excluded: - Compensatory Leave (has its own limit)

This rule **cannot be bypassed by Admin**.

5.2 Monthly Working Day Limit

- Maximum **5 working days of leave per month**
- Applies to:
 - Casual
 - Sick
 - LOP
- **Planned Leave is exempt**

Working days exclude: - Sundays - Holidays - Non-working Saturdays (based on employee policy)

Half-day leave counts as **0.5 day**.

6. Weekday Restrictions

To prevent long weekends:

Blocked days (unless rules below allow): - ❌ Monday - ❌ Friday - ❌ Tuesday & Thursday if applied within 10 days

Exceptions: - Casual or LOP applied **10+ days in advance** - Planned Leave with valid advance notice - Compensatory Leave (fully exempt)

Admins **can override weekday restrictions** with reason.

7. Saturday Clubbing Policy

If a Saturday is a **weekly off** for the employee:

Then leave is restricted on: - Friday before that Saturday - Monday after that Saturday

Allowed combinations: - LOP → Always allowed - Planned Leave → Only if applied **30+ days in advance** - Casual Leave → ❌ Never allowed

This prevents Friday-Saturday-Sunday-Monday leave chains.

8. Admin Override Rules

Admins can override: - Weekday restrictions - Advance notice issues

Admins **cannot override**: - Monthly request limits - Monthly working-day caps - Overlapping leave

Every override is: - Logged - Audited - Stored with reason

9. Approval-Time Balance Check

Even if a leave was valid at apply time: - The system **rechecks balance before approval**

If balance was used later: - Approval is blocked

This prevents negative leave balances.

10. Final Outcome Logic

A leave request is **approved only if**: - Dates are valid & non-overlapping - Employee is eligible - Monthly limits are respected - Weekday & clubbing rules pass - Balance is sufficient (where applicable)

Otherwise, the system returns a **clear human-readable reason** explaining exactly why the request failed.

11. Why This System Exists

This policy ensures: - Fairness across teams - Predictable leave planning - No misuse or favoritism - Clear expectations for employees - Reduced manual HR intervention

The system enforces policy — **HR defines it, Admin supervises it, Employees follow it.**

End of Policy Explanation

Compensatory Off (Comp-Off) Policy – Updated & Clarified

What is Comp-Off?

Compensatory Off is a leave granted to employees who work on **weekends (Saturday or Sunday)** and wish to take time off on a regular working day in return.

Eligibility

- Comp-Off is applicable **only for work done on Saturday or Sunday**.
- The worked date must be a **valid approved working day** (as per attendance records).
- Comp-Off can be taken on any eligible future working day, subject to approval and other leave rules.

Important Submission Deadline (Critical Rule)

- Comp-Off requests **must be submitted by Thursday of the same week in which the weekend work was performed**.
- The deadline is calculated based on the **worked date, not the leave date**.

Example:

- Worked on **Saturday, 07 Feb 2026**
- Deadline to apply Comp-Off: **Thursday, 12 Feb 2026**
- The Comp-Off leave itself may be taken in the following week or later (for example, **Monday, 16 Feb 2026**), as long as the request was submitted by Thursday.

What Happens If the Deadline Is Missed?

- If a Comp-Off request is submitted **after Thursday of the worked week**, the system will automatically block the request.
- This restriction applies **even if the leave date is in the future**.

Key Clarification for Employees

-  Comp-Off is **not blocked** because the leave date is next week.
-  Comp-Off is blocked **only if the request is submitted late** (after Thursday of the worked week).

System Validation Summary

- ✓ Validates weekend worked date
- ✓ Checks submission deadline against worked week
- ✓ Allows future leave dates
- ✗ Rejects late submissions automatically

This rule ensures timely reporting of weekend work and helps HR maintain accurate attendance and leave balances.
